Thank you for submitting your development team project: Design Document.

Please see your feedback below:

Please be aware that the grade may change due to the moderation and adjustment process.

Knowledge and understanding of the topic/issues under consideration (25%):

You have provided a good level of knowledge & understanding of the regulations that you have listed. There is also some explanation of the relevance of these to your allocated website, however there was scope for a bit more analysis for this section. You have mentioned GDPR etc.

Merit

Application of knowledge and understanding (25%):

There is a good demonstration of the application of knowledge with a range of security vulnerabilities listed. The various threats have generally been related to the specific website. You could have also incorporated/linked in section 5, the regulations that identify the need to address these vulnerabilities.

Merit

Criticality (25%):

Some good use of references in the first part of your submission, although these could have continued in your table in 5.1 to support the recommendations you have provided. You have ordered these by the level of potential risk to the organisation in a table format – DREAD analysis. You could have provided a brief conclusion to finalise the report.

Merit

Structure and Presentation (25%):

A well organised report with the sections clearly laid out. A good range of references were included although they were not all in the correct referencing format. Spelling and grammar are good throughout.

Distinction
